### Segovis Fungicide Now Available in California and New York

*Jennifer Zurko*

Greenhouse and nursery growers in California and New York now have access to Segovis fungicide, a recent innovation from Syngenta for controlling downy mildew and Phytophthora diseases. It features a unique active ingredient and is registered for use on ornamentals crops, trees and shrubs in greenhouses, nurseries and commercial landscapes.

Segovis contains oxathiapiprolin, a systemic fungicide and novel active ingredient that's effective at low use rates. It offers a four-hour restricted-entry interval (REI) for growers and has no signal word on the label.

Learn more about Segovis, view trial photos and download rotation programs at [GreenCastOnline.com/Segovis](http://GreenCastOnline.com/Segovis). **GT**
