Quali-Pro

Myclobutanil 20EW fungicide from Quali-Pro has received registration from the U.S. Environmental Protection Agency. A systemic fungicide powered by the active ingredient myclobutanil, a demethylation inhibitor (DMI), Myclobutanil 20EW stops and prevents plant disease. As a broad-spectrum liquid fungicide, it provides both curative and protective control of powdery mildew, rusts, scab, leaf spots and other nursery and greenhouse diseases. A single application will provide up to 28 days of control. It features an easy to measure and mix formula that's compatible with nonionic and silicone surfactants.

J&D Manufacturing

Re-designed Shaded Pole Blowers are more efficient, and include corresponding aluminum mounting brackets. Shaded Pole Blowers have adjustable damper doors designed to inflate the plastic layers of double poly-sided greenhouses to create a layer of insulation. The round blower VBM60-PC is 0.74/0.89 Amp with 60 CFM. The square VBM148-1PC is 1.40/1.68 Amp with 148 CFM. Both models are available with or without a cord. The corresponding square and round brackets allow the blowers to be mounted to a support post or tube for easy installation.

Berger Peat Moss Ltd.

Introducing Berger's new line of Organic Mixes, certified organic by USDA (NOP- National Organic Program). The new Berger Organic Mix line will provide you with a natural high-quality and consistent growing mix. Plants will benefit from an ideal root environment leading to strong and healthy growth. The new organic mix line includes the OM 2 (Germinating Mix), OM 4 (Fertilized Peat Moss) and the OM 6 (High Porosity Mix).

Proven Winners LLC

Flirtation Orange Diascia hybrid is a magnificent addition to the Diascia series with stunning layers of flowers. A cool-loving plant, it delivers vibrant orange to the garden in early summer and again in fall. Flirtation Orange is an excellent plant for early spring planting and has a mounding habit that grows 8 to 12 in. tall. Flirtation Orange intermingles well with other plants to fill in the middle ground of a combination, or use it in hanging baskets, window boxes and landscapes.

PanAmerican Seed

Mesa Yellow Gaillardia is a first year-flowering, award-winning perennial from seed. It delivers a more uniform habit and flowering time for easy scheduling and shipping. The vigorous, early-flowering and well-branched plants fill gallon containers quickly while maintaining a controlled height of 16 to 18 in. (40 to 45 cm.) without flopping. Mesa Yellow shows intense, non-fading color all season and is drought tolerant once established.

Fall Creek Farm & Nursery, Inc.

Fall Creek Farm & Nursery introduces their newest product, Fall Creek Advantage Cell Grown Transplants. It offers an alternative to traditional bare-root plant production. The Fall Creek Advantage Cell Grown Transplant is grown with the High Health Production System. Plants grown as Advantage Cell Grown Transplants will have strong, vigorous, clean root systems, which limits transplant shock. The plants' increased vigor will result in faster fruit production and ease of transplant and planting with little or no losses. **GT**
