OHP Develops PGR App

Jennifer Zurko

OHP Inc. announced the introduction of its first smartphone application designed for Apple iPhone, iPod touch and iPad users. The PGR Calculator Application is available immediately at no charge through the iTunes Application Store.

The PGR Calculator will allow the user to look up current PGR rates in ppm for spray or drench applications. The grower then enters the desired dose and the size of the application area (L x W) or the number of pots for a drench and the App calculates the amounts of solution and product needed.

As new generations of growers begin to adopt technology into their work practices, applications like the PGR Calculator will become useful tools, says Dan Stahl, OHP vice president of marketing and business development. The application allows growers to perform rate calculations for the OHP stable of PGRs, including Augeo, B-Nine, Cycocel and Paczol.

For more information on the PGR Calculator Application, please visit www.ohp.com or call an OHP representative at 800-356-4647. **GT**
