BioSafe Systems Improves ZeroTol 2.0

Jennifer Zurko

BioSafe Systems has introduced ZeroTol 2.0 Algaecide/Fungicide. The new labeling provides an updated active ingredient statement, an increased number of controlled pathogens, and new labeling instructions for the treatment of artificial turf. ZeroTol 2.0 is used to treat and control plant pathogens on ornamental plants and turf.

ZeroTol 2.0's active ingredients include 27% Hydrogen Peroxide and 2% Peroxyacetic Acid. Due to its fast acting oxidation process, mutational resistance of harmful organisms is not possible.

ZeroTol 2.0 is available in 2.5, 30, 55, and 275-gal. sizes. For more information about ZeroTol 2.0, contact BioSafe Systems at (888) 273-3088. **GT**
