## How-To Videos Available for IGC Use

*Jennifer Polanz*

Dave Epstein, who appears on the popular GrowingWidsom.com website, has two new how-to videos available as free downloads for use on garden center websites, courtesy of Tesselaar Plants. In his newest container-oriented video, Dave shows how to create an organic mixed container in five easy steps. This video is particularly helpful for people with limited space. The video example shows a simple mix of Flower Carpet Scarlet rose and Superbena Royale Chambray, plus an assortment of culinary herbs.

In another video, "Discovering Volcano Phlox," Dave shows the benefits of the plant and how and where to plant it. These videos and more are available for free download from Tesselaar Plants Newsroom at [www.Tesselaar.Newsroom.com](http://www.Tesselaar.Newsroom.com). Dave has been a professional meteorologist and horticulturist for three decades. He has two regular columns on Boston.com and has his own website, [GrowingWisdom.com](http://GrowingWisdom.com), full of helpful how-to videos. **GP**
