Adriana Heikkila

Four Star Greenhouse Inc.

Hummingbirds will line up to visit Vermillionaire Cuphea from Four Star Greenhouse. This low-maintenance, drought-tolerant beauty features deep orange tubular flowers that sit on well-branched, mounding plants. Vermillionaire is a southern annual that does well everywhere, loves the sun and thrives where heat and humidity are abundant. It stands between 18 to 28 in. and can be a great addition for gardeners, tolerating higher amounts of water and fertilizer, yet not prone to Oedema.

Sun Gro Horticulture

Sunshine, Fafard and Metro Mix professional mixes containing Resilience are now available. These patented growing mixes enriched with silicon create thicker, stronger stems; improved root mass and structure; increased drought tolerance; enhanced shelf life; less shrinkage and increased resistance to insects and diseases. When supplemented with silicon-enriched nutrients, plants recover better from less-than-perfect watering, which gives them a longer shelf life. The denser, more compact growth of plants grown in Resilience helps growers save space and reduce their need for plant growth regulators.

Nexus Greenhouse Systems

The modified gothic arch design of the Nexus Grand Teton incorporates high overhead clearance, leaving ample room for equipment and crops. The Nexus Grand Teton provides outstanding condensate control and is adaptable to any type of covering. With a proven track record in designing the proper environment for controlled environment agriculture, Nexus can help you design the ideal environment for your operation.

Suntory Flowers Ltd.

The world's leading vegetative petunias just got bigger with the introduction of the Surfinia Sumo series. As the name implies, Surfinia Sumos from Suntory Flowers are big and bold. Plants produce mega mounds of color and are full of big flowers. This vigorous series is perfect for large containers, baskets and landscape beds. Colors include: Sumo Pink (pictured), Sumo Plum and Sumo Bold Lilac. Pair with vigorous accent varieties, such as Desana ipomoea, in combinations.

PanAmerican Seed

The first calibrachoa series from seed, Kabloom gives you flexibility. Flexibility of inputs beyond liners or URCs. Flexibility to receive product when the weather holds up vegetative shipments. Flexibility to staff your crew based on production needs, not shipping dates. Kabloom puts out the same amount of color as mid-vigor vegetative calibrachoa—side by side, you can't tell the difference. Available in core solid colors. Ideal premium input for both mono containers and mixed combos. Find culture recommendations online at www.panamseed.com/kabloom.

SHS Griffin

New for 2015, Corey Single Gold joins the popular Corey series of *Coreopsis grandiflora*. Corey Single Gold displays large single flowers in rich golden yellow; plants offer strong vigor and exceptional branching. Bred by Syngenta Flowers, this quick-to-finish variety is well suited to 6-in. pots, gallons and mixed containers. Consumers enjoy reliable, free-flowering performance all season long in landscapes and containers. The Corey series is hardy in Zones 6 to 10, with a garden height of 18 to 24 in. Supplied as unrooted cuttings exclusively through SHS Griffin. **GT**
