New Products

Adriana Heikkila

Four Star Greenhouse Inc.

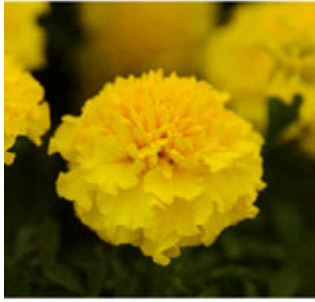

Like its other Superbena cousins, the Superbena Royale Cherryburst Verbena from Four Star Greenhouse offers a robust habit, mildew resistance and extraordinary color—all in the more compact Royale line. These hardy, well-branched plants need fewer PGR treatments and are easy to produce in small pots. Cherryburst has the added feature of a star pattern that's distinctive up close, while it provides bright color from a distance.

Ludvig Svensson Inc.

Svensson's Tempa climate screens provide the highest energy saving value at any given shade level. The Tempa formula uses aluminum strips in closed structure to provide maximum energy savings at night while doubling as a shading and cooling screen by day. A single screen solution with dual purposes, Tempa is the ideal screen for moderate climates and in greenhouses where multiple crop varieties are grown. Available in both firebreak and flame retardant versions.

Aquascape Inc.

Aquascape's Automatic Dosing System for ponds, fountains and pondless or disappearing waterfalls is dependable, easy to use and fully programmable. The system helps water feature owners maintain optimal water quality by accurately and consistently applying their choice of water treatment. Four water treatment options are available for use with the Automatic Dosing System to maintain, clean, clear water and protect the water feature. The dosing system automatically adds your selected water treatment product to the pond or water feature several times per day, helping maintain optimum water quality and clarity.

PanAmerican Seed

Developed in the heat for the heat, the new Hot Pak series of French Marigold from PanAmerican Seed offers continuous and reliable flowering, even in locations with high temperatures. The perfectly matched plants stay compact and take heat and humidity in the garden with ease. Ideal for your landscape customers and pack programs. The early release of seed availability for spring sales includes Yellow, Orange and a Mix, with five new colors coming May 1.

OASIS Grower Solutions

Oasis Hydroponic Fertilizer (OHF) is a complete nutrient system that delivers all 13 essential elements needed for superior root growth. Hydroponic growers large and small can eliminate the guesswork, simplify their operations and reduce labor and supply costs with this easy-to-use, one-bag solution.

Terra Nova Nurseries Inc.

Coreopsis Buttermilk raises the bar on coreopsis varieties in today's marketplace with its extra hardy breeding characteristics. While currently available to growers in the form of pre-ordered liners, Buttermilk will be released to garden centers in late 2015. Coreopsis Buttermilk is a hardy new hybrid with *Coreopsis verticillata* breeding. Its light yellow flowers are complemented by feathery, mildew-resistant foliage and a neat, upright mounding habit. Average size: 15-in. foliage height, 25-in. foliage spread and 17-in. flower height. Ideal blender plant for mixed beds, containers or mass plantings. Zones 5 to 10. **GT**
