Dosatron Introduces Nutrient Delivery System Kits

Jennifer Zurko

Dosatron International, Inc. has introduced Nutrient Delivery System Kits. Powered by Dosatron dosers, the kits consist of a Starter Kit, Mixing Chamber Kit and a Monitor Kit, and are designed to perform in both indoor and outdoor environments. They provide precise nutrient management, saving the grower money by eliminating waste and increasing yields, and they're simple and inexpensive to maintain.

"Based on grower demand for a do-it-yourself system, Dosatron developed a multi-nutrient delivery system that is customizable for each grower's needs," said Chris Lundgren, Dosatron's National Sales Manager—Horticulture.

You may add up to eight Dosatron dosers (depending on incoming pressure and flow) in combination with the Nutrient Delivery System Kits. Suggested dosers are the D25RE09—11 GPM, D14MZ2—14 GPM, D14MZ10—14 GPM and the D14MZ3000—14 GPM.

The Nutrient Delivery System Kits are available wherever Dosatron injectors are sold. For more information, contact Dosatron's customer service department at (800) 523-8499 or www.dosatronusa.com. **GT**
