HRI Infographic Highlights Trade Flow Survey Results

Allison Westbrook

The Horticultural Research Institute, the green industry's national foundation for research and scholarships, has released "Where Do Plants Go?," an infographic using recent statistics collected by researchers and published in *The Journal of Environmental Horticulture*. The infographic showcases the interregional trade of plant products data collected in the National Green Industry Survey conducted by the Green Industry Research Consortium. Topics include states with the highest out-of-state plant sales, regions representing the most plant purchases, and changes in plant sales by region from 2008 to 2013.

The survey was supported by a grant from the Horticultural Research Institute. For more information about HRI, its grant-funded research, or programming, visit www.hriresearch.org or contact Jennifer Gray at (614) 884-1155. **GT**
