Bilingual Video Series on Nursery BMPs

Chris Beytes

UF/IFAS Extension has added a series of bilingual videos as part of its Greenhouse Training Online program. The latest videos on nursery best management practices are available in the UF IFAS Extension BMP playlist on the UF/IFAS YouTube channel.

The videos were developed by Tom Yeager from the UF/IFAS Environmental Horticulture department and translated to Spanish by Tatiana Sanchez, UF/IFAS Extension Alachua County commercial horticulture agent. The new videos explain several production practices in the Nursery BMP manual by the Florida Department of Agriculture and Consumer Services (FDACS). Topics include irrigation management, soil testing and more.

These videos and related training on nutrient management are included in the upcoming UF/IFAS Extension course “Advanced Nutrient Management” in the Greenhouse Training Online program (hort.ifas.ufl.edu/training). Registration is now open for this and other grower training courses. **GT**
