Certis Now Sells BotaniGard & Mycotrol Directly

JC Chong

Certis Biologicals, a major manufacturer of biopesticides, now sells some of its products directly through its distribution channels. Products (all formulations) under the trade names BotaniGard and Mycotrol sold in the United States and Canada were returned to Certis' portfolio as of October 1, 2022.

BotaniGard ES, BotaniGard 22WP, BotaniGard MAXX (this product also includes pyrethrins), Mycotrol WPO and Mycotrol ESO are biopesticides containing the entomopathogenic fungus *Beauveria bassiana* strain GHA.

These products are produced in Certis' U.S.-based facilities, but for years have been sold by BioWorks. The transition from BioWorks to Certis began during the summer. Certis will now provide all sales and technical support for BotaniGard and Mycotrol products. **GT**
