### A Retirement & a New President at PanAmerican Seed

*Chris Beytes*

Long-time Ball Horticultural Company employee Scott Roskuszka has accepted the role of president of PanAmerican Seed (PAS), Ball's seed breeding division. Scott will succeed Anne Leventry, who is retiring next March after 36 years with the corporation, including almost 25 in the top position at PanAmerican.

Scott comes into the role with 22 years of experience across Ball, including Finance, IT and Ball Seed, where he's served as both director of customer relations and director of supplier relations. Most recently, Scott has been PanAmerican's global director of operations.

Between now and her retirement in March, Anne will help with the leadership transition, and she will also head up a special cut flower project. **GT**
