Pillar SC Fungicide Now Available in California

Chris Beytes

BASF's Pillar SC Intrinsic fungicide is now available for use on greenhouse and nursery crops in California.

Pillar SC has two active ingredients, pyraclostrobin and triticonazole, to deliver maximum disease control against at least 26 different diseases, including Anthracnose, leaf spots, powdery mildews, rusts, stem diebacks and blights, vascular streak dieback, root and crown diseases, Fusarium, Rhizoctonia, Cylindrocladium, Sclerotinia and Phytophthora.

Plus, as an Intrinsic product, it offers proven plant health benefits, including stronger, denser root systems and enhanced stress tolerance.
