Tough Questions? Damm Has Easy Answers

Chris Beytes

Actually, they've had the answers for several years now, via an online forum where you can post questions and read others regarding irrigation, sprayers, tools, techniques and what have you. Check it out at <https://damm.websitetoolbox.com>.

Now Damm has gone further, linking the forum to each page of their online catalog, so you can view questions and answers about that product right there on the product page. That might help you deal with your own problems or convince you that the product you're looking at will do the job you need. **GT**
