## Dramm Offers VideoChat Service Team: For Service and Repair

Jennifer Zurko

To help DIYers service their Dramm Sprayers, the company is now offering VideoChat with their service team to help diagnose and suggest repairs via Skype and FaceTime. From the Dramm website, customers can get information on sending their machine to Dramm, the status of their orders, print a shipping label and now schedule a VideoChat with their service team. To access this service, customers can visit [www.dramm.com/service](http://www.dramm.com/service). **GT**
