Eason’s New Perennials Booklet is Out

Ellen C. Wells

Eason Horticultural Resources (EHR) typically produces two product booklets compiling findings from their California Spring Trials tours. Even in this far-from-typical year, EHR still produced two booklets! They’ve just released their Hot New Perennials edition using information gathered from the young plant producers, the breeding companies and the breeders’ representatives. The EHR folks may not have been able to do the plant evaluations themselves, but they knew the right people to call on to get the booklet produced.

If you’d like to receive a printed version, drop them a request at info@ehrnet.com or download it (along with their collection of other publications) from ehrnet.com. **GT**
